

Energy policy statement

VGC Group Ltd has committed to operate a formal energy management system (EnMS) to the requirements of the International Standard ISO 50001:2011 in order to achieve energy performance improvement and we commit to continual improvement in this discipline. We are committed to improving the energy and carbon performance of our offices and sites by developing a culture of continuous improvement, through monitoring, setting targets, training and communication.

The scope of the VGC EnMS is all of its energy use for delivery of contracts, services and personnel to the construction and rail industries including the operation of all support offices, depots and transportation.

To deliver this, VGC Group Ltd will provide the necessary resources and provide measured information to achieve set objectives and targets.

We will meet legal requirements applicable to our energy management and any other related requirements to which VGC Group Ltd subscribes.

Our energy objectives and targets will be formally set and reviewed. Our long and medium term goals are:

- Commit organisational resources to improve energy management.
- Adopt a method of continual improvement to increase energy efficiency.

Our energy management system will support the purchase of energy efficient products and services, plus the commissioning of any design related to our energy performance improvement.

The energy management system will be documented and communicated to all levels of VGC Group Ltd staff.

This policy will be formally reviewed annually and updated as required.
